functionality. Quicklook Plugin, MacFuse

Plugin requires Mac OS X 10.5 "Leopard".

MacFuse Plugin requires that MacFuse

be installed (separate download). Growl

support requires Growl to be installed

(separate download).

### The Best Just Got Better!

These days, thousands of megabytes of files are created or downloaded daily on your Mac. Reclaim that space with Stuffit Deluxe 2009!

Stuffit 2009 can compress files by up to 98% of their original size. Stuffit's advanced MP3, PDF and Image compression enhancements that saves more space than ever before. Place what used to be large files into email-friendly attachments and fit more onto CDs and DVDs.

Stuffit 2009 takes advantage of the latest Mac OS X technologies: Use Quick Look to peek inside compressed archives, mount archives directly to the desktop, and sync and backup archives to Apple's new Mobile Me service.

Shrink JPEGs up to 30% with no loss in quality!

With centralized access to all your compressed files, support for personal profiles that streamline your workflow and expansion support for over 25 compression formats. Stuffit is the ultimate compression and archive management solution!

### New and improved features:

- **NEW! Quick Look and Time Machine Support** – Peek within an archive without having to uncompress it from within Mail, the Finder, or any application that supports Quick Look. Stuffit's Quick Look support extends to Time Machine as well – look inside archives that were backed up long ago!
- **NEW! MobileMe™ Support** – Automatically transfer and backup archives to your iDisk via DropStuff and Stuffit Scheduler.
- **NEW! Duplicate Folding** – Stuffit stores only a single copy of duplicate items, eliminating redundancy and increasing savings!
- **NEW! Profiles** – Optimize your workflow by setting up and saving settings for different types of compression formats and preferences into a droplet that you can drag and drop files to.
- **NEW! Support for Google's MacFuse** – Mount any browsable archive type in the Finder, just like a disk or disk image. Makes browsing archives as easy as using the Finder!
- **Optimized Compressors** – Stuffit's compressors are specifically targeted for maximum efficiency with MP3s, PDFs, iWorks files and Microsoft Office documents, emails and presentations! Regain gigabytes of space!
- **Optimized for Multi-Core Speed** – Stuffit takes advantage of today's dual- and quad-core processors to deliver the fastest possible performance.
- **Make Multi-Megapixel JPEGs Smaller** – Stuffit's exclusive patent-pending technology compresses any JPEG image up to 30% without any loss of quality! Fit more of your photos on your hard disk, CDs, DVDs and in email.
