

StuffIt Deluxe® 2010

Compress, Secure, Send

The Easiest Way to Share Large Files Online

Utilize an innovative new way to send and share files with StuffIt® Connect. Securely upload, access and share up to 2GB of your files from anywhere, even over your iPhone®, BlackBerry®, Windows Mobile®, Android™ or other Smart Phone. StuffIt® SmartSend automatically chooses the best way to send your files when emailing.

The Ultimate Zip, File Management, Privacy and Backup Solution

StuffIt Deluxe not only gives you the ultimate in file compression, with patented technology to shrink your photos and graphics without any loss in quality; it also streamlines your workflow with plug-ins for Photoshop® and Microsoft® Office. StuffIt automatically backs up your files to disc or online, and protects your sensitive information with strong 512-bit encryption.

Easily upload and share up to 2GB of files with automatically created invites

See thumbnails of your images inside archives

NEW! Easy File management—Anytime, Anywhere with StuffIt® Connect: Enjoy convenient access to a new kind of file transfer and storage service. Securely store up to 2GB worth of files and share them via email invitations to download your files.

NEW! StuffIt® SmartSend: Take the guess work out of sending large files via email— simply select the files you want to send and choose “Stuff & Mail”. Small files are automatically compressed and attached to a new email message, while larger items are uploaded to a secure website via StuffIt® Connect, which allows you to download files from anywhere. Say goodbye to email bouncebacks.

Immediate Access: StuffIt supports more than 25 compression formats, including expansion support for 7z archives, LZMA compressed files, segmented Zip archives and split archives.

NEW! Improved Compression: StuffIt Deluxe 2010's improved image compressor now compresses high-quality graphic and audio files, dramatically reducing the size without compromising their quality.

Plug-in Support for Your Favorite

Applications: The power of StuffIt is available from within Adobe Photoshop and Microsoft Word, Excel, PowerPoint and Outlook.

Make Multi-Megapixel JPEGs Smaller:

StuffIt's exclusive patent-pending technology compresses any JPEG image up to 30% without any loss of quality! Fit more of your photos on your hard disk, CDs, DVDs and in email.

StuffIt Droplets: Customize your workflow by packaging compression and destination settings into a single drag-and-drop Droplet icon. Simplify backing up data, uploading files, and attaching files to emails. Droplets gives you immediate access to StuffIt's power, without having to launch the application.
